 This is the second most amazing thing that has happened to humanity. The most amazing thing ever will only happen when people understand the real meaning behind these words! I've tried to understand this information for 2 year. I've probably watched this presentation over 100 times. Gah! words are too limited for this. Here have some love brother! :)

 What an opening to a video, with all the crap sprouted from our politicians, superstars, sports stars, businessmen, preachers and with our fragile planet being so frightened of law suits and offence this is excellent to hear someone just speak straight up and down.

 One of Jeremy Griffith's books is titled 'A Species in Denial' and this video makes that title so much apparent in my mind because sometimes you can get lost in intellectual arguments about the purpose or meaning of existence but its not difficult and its not ethereal or confusing. Biology is simple & fascinating and our story is simple & fascinating we just have such an aversion - we live with such denial about what is really going on on the planet but this video sheds light on on all of that.
